The CC-/one.lf/zero.lf/zero.lf/one.lf automated hematology analyzer

Dedicated to Supporting People’s Health

In 1959, Sysmex founder Taro Nakatani visited the United States, looking for new business ideas. His attention was drawn to the field of medical electronic devices. When he returned to Japan, Mr. Nakatani began working with young researchers, conducting studies and engaging in development. In 1963, they succeeded in the commercialization of Japan’s first hematology analyzer, the CC-1001. Moving on from this success, TOA MEDICAL ELECTRONICS CO., LTD. (current Sysmex Corporation) was established in 1968.

Realizing a healthy society is our ideal. Our corporate culture emphasizes taking on challenges in developing new products and technologies. Furthermore, we have carried forward Sysmex’s values—building trust and confidence among all our stakeholders—since the time of our founding.
