2. Reasons for the Revision

The yen has depreciated more than assumed in our initial forecasts. Due to this factor, plus financial income and other improvements, we now expect net sales, operating profit, profit before tax and profit attributable to owners of the parent for the fiscal year ending March 31, 2018, to outpace our previous forecast.

As exchange rates used in calculating our forecast for the third quarter onward, we have revised the assumed euro exchange rate from €1=¥115 to €1=¥130, but we leave the assumed US dollar exchange rate at US\$1=¥110.

Note: The forecasts above were made based on information available on the day of this release.

Actual results may therefore differ materially from those described above due to various unforeseen factors and possible events in the future.
