

Report of the Sysmex Scientific Seminars in Asia 2007

4th Sysmex Scientific Seminar in Thailand 10th Sysmex Scientific Seminar in China

It was our great pleasure to have held two scientific seminars in 2007. One was held in Bangkok, Thailand, and the other was organized in Hainan province, China. More than 700 medical professionals in total participated in these seminars. Much to our delight, the participants expressed deep interest in each lecture in the Thai seminar. In China, the seminar venue was an island in the South China Sea, and we greatly appreciate the attendees having traveled great distances and having sacrificed precious time to take part in it. We will continuously do our best to present useful and informative seminars for all customers in Asian countries.

The outline of the seminars is as follows:

4th Sysmex Scientific Seminar in Thailand

The seminar day was Monday and was the same day of the week as the birthday of the King Bhumibol. Therefore, the seminar hall was covered over with yellow because all participants wore yellow shirts to express their love and respect to the King. The yellow and fervor of audiences overwhelmed us.

The seminar was hosted in cooperation with Sysmex Asia Pacific Pte Ltd., Sysmex (Thailand) Co., Ltd., and our distributors, MedOne and Meditop. We sincerely thank them for their cooperation.

Date: 4th June, 2007

Place: Bangkok, Thailand

Program:

1. Systemisation: Time to Think about Time
Mr. Geoffrey GIBSON (Sysmex Asia Pacific, Australia)
2. Anti-Coagulant Therapy
Dr. Panutsaya TIENTADAKUL (Siriraj Hospital, Thailand)

5. Experience of Implementing a LIS at a Large Public Hospital with Diverse Clinical Environment
Dr. Nisarot OPARTKIATTIKULI (Siriraj Hospital, Thailand)

10th Sysmex Scientific Seminar in China

The seminar celebrated its 10th anniversary. In the memorable seminar, five lectures were held on "Medical risk management" and "Blood morphology", which had recently been drawing attention in the Chinese medical field. The seminar has had a good reputation for the last 10 years. Last year, about 550 medical professionals attended the seminar from all over China.
